Forecast for Friday 07 Jun 2024

Weather: A cloudy start with outbreaks of showery rain. The rain will be mostly light and will tend to weaken whilst migrating east, eastern parts remaining mostly dry. The rain will clear east around lunchtime, followed by sunny spells and largely dry conditions. However, these will not last and more cloud will push in from the west during the afternoon. Dry and largely cloudy in the evening.

Chance of cloud-free hill tops above 600m: 40% becoming 90% then lowering to 40% from the west.

Low cloud and visibility: Mediocre initially, with broken cloud obscuring hills as low as 400-500m. Visibility improving around lunchtime as rain clears to become very good, with cloud bases lifting above summits before filling and lowering again from the west during the evening.

Meteorologist's View

Feeling rather cool for the time of year, especially on summits where temperatures are exacerbated by breezy conditions.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Fri 07 Jun 2024	0mm	0.2mm	3.6mm

Forecast for Saturday 08 Jun 2024

Weather: A band of heavy showers clears southeast in the morning followed by a good deal of sunshine. Staying mostly dry in the afternoon. Feeling cold on summits but with high UV levels sun protection is advised.

Maximum wind: Northwesterly 15-20mph gusts 25-30mph.

Chance of cloud-free hill tops 600m: 30% in the morning becoming greater than 95%.

Low cloud and visibility: Scattered to broken amounts of cloud 400-500m as a band of showers passes in the morning with visibilities falling to moderate or poor. Once cleared, cloud bases quickly lift and break with bases well above summits. Visibility improving to very good.

Temperature: **Valleys:** Plus 11 Celsius becoming 15 Celsius.
At 600m: Plus 5 Celsius becoming Plus 8 Celsius.
Freezing level: Above summits.
